Dear San Jacinto River/Houston Ship Channel Community Members and Stakeholders-

Welcome to those of you who are new to Galveston Bay Foundation (GBF) San Jacinto River Waste Pits Superfund Site (SJRWP) mailing list. We hope that you find the [our SJRWP webpage](#) helpful!

In an effort to keep you informed about the December 2015 discovery of the armored cap deficiency by the EPA's dive team and the agency's response, as well as to provide answers to frequently asked questions from the February 17th EPA open house including those about groundwater sampling and cap monitoring/maintenance, GBF has added the following additions to the webpage.

Under *Updates* at the top of the page, we have added:

- December 2015 Armored Cap Deficiency Response and Results:
 - Results Tables for the Potentially Responsible Parties' Sediment Sampling
 - Lab Report on Sediment Samples Collected and Analyzed by EPA Contractor
 - Sediment Sampling Locations Map
 - EPA Dive Team Report
- Groundwater Sample Locations and Results from the May 2013 Remedial Investigation (see full RI under *Independent Review Findings* below)
- EPA Feb. 17, 2016 Community Meeting Slides

Under *Independent Review Findings* down the page, we have added:

- Operations, Monitoring and Maintenance (OMM) Plan for the armored cap (this is Appendix N from the May 2012 Time Critical Removal Action Completion Report; scroll down to the 4th bullet in *Independent Review Findings* and then click on the link for the OMM Plan).

PLEASE NOTE that the latest information from the EPA indicates that the proposed plan for cleanup will be available for review and public comment in December 2016. We will update the GBF SJRWP webpage with new information and documents as they become available and will provide you notice about any upcoming public meetings.

Please share this e-mail with your family, friends, and other members of the community and encourage them to contact me to be added to the mailing list.

Sincerely-
Scott
